

Apple IIGS Error Codes

no_error	equ	\$00	no error has occurred
bad_system_call	equ	\$01	bad system call number
fst_load_fail	equ	\$02	couldn't load FST
invalid_pcount	equ	\$04	invalid parameter count
gsos_active	equ	\$07	gsos already active
dev_not_found	equ	\$10	device not found
invalid_dev_num	equ	\$11	invalid device number
drv_r_bad_req	equ	\$20	bad request or command
drv_r_bad_code	equ	\$21	bad control or status code
drv_r_bad_parm	equ	\$22	bad call parameter
drv_r_not_open	equ	\$23	character device not open
drv_r_prior_open	equ	\$24	character device already open
irq_table_full	equ	\$25	interrupt table full
drv_r_no_resrc	equ	\$26	resources not available
drv_r_io_error	equ	\$27	I/O error
drv_r_no_dev	equ	\$28	device not connected
drv_r_busy	equ	\$29	driver is busy & not available
drv_r_wr_prot	equ	\$2B	device is write protected
drv_r_bad_count	equ	\$2C	invalid byte count
drv_r_bad_block	equ	\$2D	invalid block number
drv_r_disk_sw	equ	\$2E	disk has been switched
drv_r_off_line	equ	\$2F	device off line / no media present
bad_path_syntax	equ	\$40	invalid pathname syntax
invalid_ref_num	equ	\$43	invalid reference number
path_not_found	equ	\$44	subdirectory does not exist
vol_not_found	equ	\$45	volume not found
file_not_found	equ	\$46	
dup_pathname	equ	\$47	create or rename with existing name
volume_full	equ	\$48	
vol_dir_full	equ	\$49	volume directory full
version_error	equ	\$4A	
bad_store_type	equ	\$4B	bad storage type
end_of_file	equ	\$4C	
out_of_range	equ	\$4D	position out of range
invalid_access	equ	\$4E	access not allowed
buff_too_small	equ	\$4F	buffer too small
file_busy	equ	\$50	file is already open
dir_error	equ	\$51	directory error
unknown_vol	equ	\$52	unknown volume type
parm_range_err	equ	\$53	parameter out of range
out_of_mem	equ	\$54	out of memory

dup_volume	equ	\$57	duplicate volume name
not_block_dev	equ	\$58	not a block device
invalid_level	equ	\$59	specified level outside legal range
damaged_bitmap	equ	\$5A	
bad_path_names	equ	\$5B	invalid pathnames for change_path
not_system_file	equ	\$5C	not an executable file
os_unsupported	equ	\$5D	operating system not supported
stack_overflow	equ	\$5F	too many applications on stack
data_unavail	equ	\$60	data unavailable
end_of_dir	equ	\$61	end of directory has been reached
invalid_class	equ	\$62	invalid FST call class
res_not_found	equ	\$63	file does not contain req. resource
invalid_fst_id	equ	\$64	
invalid_fst_op	equ	\$65	FST does not handle this type of call
fst_caution	equ	\$66	FST handled call, but result is weird
resource_exist	equ	\$70	cannot expand file, resource exists
res_add_err	equ	\$71	cannot add res fork to this type file
network_error	equ	\$88	generic network error

Fatal Errors:

unclaimed_irq	equ	\$01	unclaimed interrupt
sd_scm_dealloc	equ	\$02	deallocation error
sd_scm_alloc	equ	\$03	allocation error
wrong_os_ver	equ	\$11	wrong operating system version
bad_queue	equ	\$77	the notification_queue is corrupted
