

Apple II File Type Notes

Developer Technical Support

File Type: **\$C0 (192)**
Auxiliary Type: **\$0003**

Full Name: Packed Apple IIGS QuickDraw II Picture File
Short Name: Packed QuickDraw II PICT File

Written by: Matt Deatherage

November 1988

Files of this type and auxiliary type contain a packed QuickDraw II picture.

Files of type \$C0 and auxiliary type \$0003 contain a packed QuickDraw II picture (a.k.a. PICT, after its counterpart on the Macintosh), and this file format is the same as file type \$C1 and auxiliary type \$0001, except files in this format are packed. If you encounter a file of this type, you should be able to get its length, allocate a handle of the same size, read the file into the handle, use `UnPackBytes` to restore the picture to its original format, and call `DrawPicture` to display the picture. Refer to Apple IIGS Technical Note #46, DrawPicture Data Format for more information on the internal format of QuickDraw II pictures.
