

Apple II File Type Notes

Developer Technical Support

File Type: **\$C1 (193)**
Auxiliary Type: **\$0001**

Full Name: Apple IIGS QuickDraw II Picture File
Short Name: QuickDraw PICT File

Written by: Matt Deatherage

November 1988

Files of this type and auxiliary type contain an unpacked QuickDraw II picture.

Files of type \$C1 and auxiliary type \$0001 contain an unpacked QuickDraw II picture (a.k.a. PICT, after its counterpart on the Macintosh), and this file format is the same as file type \$C0 and auxiliary type \$0003, except files in this format are unpacked. If you encounter a file of this type, you should be able to get its length, allocate a handle of the same size, read the file into the handle, and call `DrawPicture` to display the picture. Refer to Apple IIGS Technical Note #46, DrawPicture Data Format for more information on the internal format of QuickDraw II pictures.
