Beagle Basic Summary (see instruction manual for details)

TO ENHANCE APPLESOFT:

1. Boot the Beagle Basic disk and Run "CREATE NEWBASIC".
2. Add selected features, and/or change commands & error messages.
3. Select Main Menu option "S" to Save enhanced Applesoft on disk as "NEWBASIC".

TO LOAD & USE NEWBASIC:

- (Note: "NEWBASIC" does not exist until you *create* it; see steps 1-3 above).
1. Put the "NEWBASIC" and "NEWBASIC LOADER" files on the same disk.
 2. Run "NEWBASIC LOADER" to load "NEWBASIC" into auxiliary memory.
- (To access normal Basic, boot a normal disk.)

Keychart Commands

- 1 MENU:** Returns you to the Main Menu from any part of "CREATE NEWBASIC".
- 2 EDIT:** Move cursor* to command or message to be edited. Enter new name (Return).
- 3 FIND:** Enter command name (full or partial) to be found (Return).
- 4 SORT:** Temporarily alphabetizes commands on screen. (Use option 0 to *print*.)
- 5 REVEAL TOKEN:** Move cursor* to command. Displays hex & decimal token value.
- 6 HIGHLIGHT CHANGES:** Temporary inverse of *new* commands or error messages.
- 7 HIGHLIGHT STANDARD:** Temporary inverse of *original* words that have been changed.
- 8 NORMALIZE:** Standardizes *all* command or error message *names* (whichever is visible).
- 9 PRINT OLD/NEW:** Sends current & standard commands or error messages to printer.
- 0 PRINT SCREEN:** Sends the current text screen to printer.

*Apple Arrow Keys move the cursor (use A & Z for up & down on non-IIe Apples).
