

BEAGLE

*When you run the
AW 3.0 Companion disk,
you'll be greeted by the
familiar AppleWorks-style
menus. Just select the
changes you want to make
and you're done.
AppleWorks will be
customized to your liking!*

*AW 3.0 Companion
works with
AppleWorks v3.0 only,
and requires an Apple
IIe, IIc, IIc+ or IIGS
with one 5.25 or 3.5
disk drive.*

*After all that AppleWorks has
done for you, don't you think you
should do something nice for
AppleWorks?*

AW 3.0 Companion is only
\$39.95. Go to your local dealer
and buy it today. Or, order
directly from Beagle Bros. Call:

AppleWorks v3.0.

AW 3.0 Companion

BEAGLE

AW 3.0 Companion is the official AppleWorks customization program from Beagle Bros, the developers of AppleWorks v3.0.

AW 3.0 Companion can do all this:

- Eliminate several undocumented features AppleWorks owners have reported.
- Allow the use of extra memory as both AppleWorks desktop space and a RAM drive at the same time!
- Eliminate all those "Do you really want to do this?" questions!
- Change Return to select "Yes" instead of "No" at AppleWorks prompts.
- Change the order in which AppleWorks lists your files.
- Add MouseText to screens and menus.
- Adjust the cursor blink rate to any speed.
- Change the cursor and Return characters to something else.
- Change the obnoxious AppleWorks beep to something less annoying.
- Place the OA-Q menu anywhere on the screen.
- Speed up loading and recalculation of the Spreadsheet by restricting it to 999 rows.
- Set the direction of the Enter key inside the Spreadsheet.
- Restore cursor position when re-loading Word Processor and Data Base files.
- You get over 70 ways to enhance your copy of AppleWorks!
