

GAP UPDATE

Several new features have been added to GAP Version 1.2.

NEWSROOM CLIP ART

You can now import Newsroom Clip Art graphics with GAP. To do this, select Newsroom Clip Art from the Source Graphics Menu. You can then convert the Clip Art graphics into high resolution, double high resolution and super high resolution graphics. Note: Some Newsroom Clip Art disks are copy-protected. GAP will not be able to read these disks unless you are using ProDOS.8 (earlier versions of ProDOS will not work). ProDOS.8 Version 1.6 is provided on the GAP Master disk.

PRINT SHOP GRAPHICS

When you select Print Shop graphics for the source type, you will be presented with a Graphic Size Menu. You can select seven different magnification sizes from this menu. Although some of the sizes will appear to be stretched when viewed on the screen, they may appear to be normal when used with some graphics programs. Each menu selection also gives you a number which tells you how many different Print Shop graphics can be saved on one screen.

"Variety" is a special size option. It allows you to load one Print Shop graphic and display it in five different magnifications.

DHR TO HR

Version 1.2 of GAP allows you to convert DHR pictures into HR pictures. This is only recommended for black and white pictures. It does not work well with colored pictures. The main purpose of this option is to allow you to convert DHR pictures on the TimeWork's Publish-It! ArtWork disks into HR pictures so that they can be used with Springboard's Publisher.

SAVE MENU

We've added one new menu to the GAP program. This is the SAVE MENU. From this menu, you have the option of saving the final graphic to disk, viewing the graphic on the screen or inverting the graphic. Inverting a graphic twice will return it to the original state. We recommend that you invert all graphics which you intend to use with Beagle Bros SuperFonts or Springboard Publisher.

Publisher and Newsroom are trademarks of Springboard Software. Publish-It! is a trademark of TimeWorks. Print Shop is a trademark of Broderbund Software. SuperFonts is a trademark of Beagle Bros. Software.
